TWINTIER[®]

RB401T-E *STAND-UP*
BATTERY POWERED REBAR TYING TOOL

FEATURES/BENEFITS

1 REDUCES BACK STRAIN

The RB401T-E is an ergonomic solution for backbreaking slab work.

2 ADJUSTABLE HANDLES

Users can adjust the handles to 2 positions, to find the most comfortable fit for their height.

3 TRIGGERLESS TECHNOLOGY

An automatic contact mechanism (Pat. Pending) allows the tool to instantly tie when pushed down over a rebar intersection.

4 SHORTER TIE HEIGHT

A Wire Bending Mechanism (Pat. Pending) produces a shorter tie height. Less concrete is needed to fully cover a wire tie.

5 TILT SENSOR

The tilt-sensor prevents the tool from tying when angled upward.

6 ENCLOSED DESIGN

Greater protection against debris and moisture entering the tool.
