

tackfix acrylic adhesives

New!

Instant bonding system for fixing carpet tack strips to floors

tackfix is the fastest, strongest, most competitive hot melt system on the market. The **tackfix 48** high performance acrylic adhesive, along with the new **tec805-12** industrial high-quality glue gun, out-performs all competitors in this section of the market.

The **tec805-12** gun has a fast heat-up time of less than five minutes and can dispense over 1.8kg (4lbs) of glue per hour. It is lightweight, yet robust, and comes with an illuminated on/off switch, detachable base stand, and adjustable full-hand lever trigger for optimum comfort. Built to comply with worldwide industrial and electrical safety standards, it is covered by a full one year warranty.

tackfix 48 is a non-toxic hotmelt adhesive that has been specially formulated to run well in the gun, to give maximum output, and remain very stable if the gun is left on. **tackfix 48** acrylic adhesive will bond to a wide variety of substrates including metal, stone, brick, plastic, ceramic, wood, concrete, tiles, fibre cement board, and much more. Just apply to one surface and press the parts together for an instant bond.

tackfix 48-12mm (1/2") acrylic adhesive is available in the following packs; 455g (1lb) bags (approximately 19 x 250mm (10") sticks), 5kg (11lb) bulk packed carton, or 10kg (22lbs) (22 x 455g (1lb) bags) per carton

The **tec805-12** glue gun is available in a point of sale blister pack

The **tec805-12** glue gun is also available in a robust plastic carrying case
